

# Chipper

## Type HSM

**Erjo horizontal infeed chipper produces pulp and board chips as well as fuel chips from edgings, slabs and trimmings.**

- Machines are available in three different designs i.e.

Type HSMF with fan for long blow distances.

Type HSMU with guiding hood for short blow distances.

Type HSMB with bottom discharge.

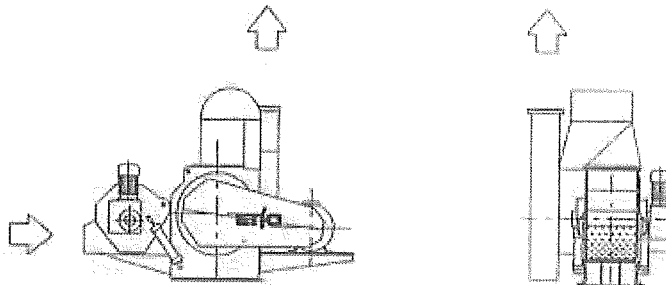

- Common to all types of machines are:

- Infeed system.
- Adjustable knife support system for different chip lengths.
- Screen cassette system for rechipping of oversized chips.
- Simple and heavy duty design.
- Low maintenance costs.
- Long service life.
- Leakproof design gives a clean working environment and a fire proof installation.
